Attention: Ms. Christina M. Underwood, Manager

Subject: Acceptance of FAA STC ST04276AT, latest date of issuance September 30, 2016

Dear Ms. Underwood:

This is in response to your letter dated June 29, 2021, requesting Transport Canada validation of the subject STC.

In accordance with our current policy associated with the review of foreign STCs, some STCs applicable to certain categories of aircraft may be accepted solely on the basis of their foreign certification, and do not require the issue of a corresponding certificate by Transport Canada. The subject STC falls within these criteria.

This STC will be entered in the national index of STCs that have been reviewed and accepted by Transport Canada for installation on Canadian registered aeronautical products.

This letter confirms formal acceptance of the referenced STC by Transport Canada. This acceptance reflects the models applicable at the time of application. Addition of models to an FAA STC – or an associated Approved Model List (AML) – that are not included in the “U.S. Eligible Aircraft List” found in Appendix B of the FAA/TCCA Implementation Procedures constitutes a change and application is required in accordance with those same Implementation Procedures in order to update this record.

Yours truly,

DocuSigned by:
